

## STUDIES CARRIED OUT WITHIN SECURE INTERNET USE UŞAK HIGH SCHOOL

Conscious use of the internet, which is one of the most important communication tools of our age, protection from harmful contents, cyberbullying and abuse have become important. In this context, the activities carried out in our school to protect our children from harmful contents of the internet and abuse are listed below:

In the scope of "Correct Use of Technology / Conscious Internet" programs at <http://www.eba.gov.tr>, prepared to inform students about conscious internet use, trainings were given by classroom guidance teachers.

The Ministry of National Education Certificate, which was developed as a precaution against the security, privacy and possible threats of the internet network and the sharing on the network in schools, is installed on tablets, smart boards, computers and devices.

In the Information Technologies (IT) classroom of our school, the necessary administrative and technical work has been carried out to reduce the accessibility of harmful content on the internet as much as possible.

Encouraging studies have been carried out for the use of "Safe Child" and "Safe Family" packages for internet use at home.

Information efforts have been made to ensure that confidential information (birth dates, phone numbers, addresses, etc.) is not shared while using social network sites.

Within the scope of protection of personal data; Care is taken not to share information that makes the person fully identifiable (T.R. ID Number, parents name, contact and residence information, etc.) on the school website.

Care is taken not to publish content, links and media (games, videos, applications, etc.) that are non-educational and pedagogically objectionable for students on the school website.

The posters prepared by the Information and Communication Technologies Authority were published on the school website and displayed on the school boards.

Within the scope of the Ministry of National Education Information and System Security Directive, only the Ministry line is used in the institution network; It is not allowed to use internet lines (ADSL, VDSL 3G, Wireless, etc.).

Necessary studies (informing parents about absenteeism via text message) were carried out to prevent students from spending time in different places (Internet cafes, etc.) during school class hours.
